PROFESSIONAL SUMMARY

Full Stack Engineer with 5 years of experience designing, building, and deploying cloud-native web applications using Node.js, Express, React, Angular, TypeScript, and AWS. Strong background in scalable architecture design, authentication systems, CI/CD automation, container orchestration, and cross-cloud infrastructure. Proven ability to deliver enterprise-grade features, reduce cloud costs, and improve security and platform reliability.

TECHNICAL SKILLS

Backend: Node.js, Express.js, TypeScript, REST APIs, Microservices, PHP, Symfony

Frontend: React, Next.js, Angular

Cloud: AWS (Lambda, Cognito, ECS, S3, CloudWatch, WAF, EKS, RDS), GCP (Cloud CDN, Cloud Armor, GKE), Azure

Databases: PostgreSQL, MySQL, MongoDB, Prisma, Sequelize

DevOps: Docker, Kubernetes, Helm, GitHub Actions, Jira

Testing: Jest, Jasmine, Karma, Mocha

EXPERIENCE

Software Engineer, *ELMO Software Limited*, Feb 2026 – Present

- Led the development to connect a new MCP to Glean via following OAuth2 standards
- Add UK Taxation, Pension and Bank Account of employee when certain customer consume our public APIs
- Enhance Public APIs to meet client requirements, this involves, param searching, param, targeting and rate limit increases.

Samsung R&D Philippines - Engineer II, May 2023 - Feb 2026

- Developed end-to-end CI/CD pipelines using GitHub Actions, reducing deployment time and eliminating manual release steps.
- Implemented MFA and session management using AWS Cognito, significantly improving platform security and compliance.
- Assigned to Samsung HQ to lead the **Bixby 4.0** platform, collaborating with cross-country teams.
- Built internal tools and services using Node.js, React, Angular Next.js and AWS to support Bixby voice assistant initiatives.

Accenture, Inc. Philippines - Software Engineer, May 2022 - May 2023

- Built RBAC UI components and backend authorization logic using Angular + Node.js for a commercialized enterprise platform.
- Migrated platform data layer from Redshift to AWS RDS, reducing cloud billing and improving query performance.
- Developed an in-app usage tracking system enabling product stakeholders to measure user engagement and feature adoption.

Accenture, Inc. Philippines - Associate Software Engineer, Nov 2020 - May 2022

- Migrated ELK stack locally hosted in EC2 to AWS EKS Cluster
- Led the creation of L2 recurring documents that tackles recurring client issues and long term migration support.
- Reducing all Common Vulnerabilities and Exposures (CVEs) of all of our EC2 instances

EDUCATION

BS in Electronics Engineer, University of Santo Tomas, Manila

CERTIFICATION

AWS Cloud Practitioner, Microsoft Azure Fundamentals (AZ-900)
